

## Unemployment decreases in Switzerland and in Canton Ticino

**Pubblicato:** Martedì 10 Aprile 2012

**In March, unemployment decreased in Switzerland and in Ticino.** According to the data published by the Administration which deal with the economy of Switzerland, **the rate has decreased to 3.2%**, against the 4.3% of February. At the end of the month 126,392 people were recorded as unemployed at the Regional Employment Exchange, 6,762 less than the previous month. **In Canton Ticino, the unemployment rate has decreased from 5.3% to 4.8%**, while in the Grisons from 1.8% to 1.6%. Young unemployment (15-24 years) affects 17,450 people, 1,630 less (-8.5%) than February. The most significant decrease of unemployment was recorded **in Locarno, where the unemployment rate has decreased by 1.4%**.

There are also reductions in the other district, in which the Canton Ticino is subdivided, with decreasing in the unemployment rate between 0.1% and 0.5%, except the district of Blenio. The districts of Riviera (5.2%), Bellinzona (5.1%), Lugano (5.0%) and of Locarno (4.9%) are the most affected in the Canton Ticino, with an unemployment rate which is higher than the average (4.8%).
