### “Let’s find money to let the Valmorea railway be revived”

**Pubblicato:** Mercoledì 6 Giugno 2012

He appeals to them **in order to find funds to revive the Valmorea railway**. Last week Cairate mayor **Paolo Mazzucchelli** took part in the meeting organised by **the closed group that deals with the project of bringing the stretch of railway between Malnate and Castellanza back to life**. The stretch from Malnate to Mendrisio is already active and a recent project carried out by **Castellanza Liuc University** calculates that the conclusion of the stretch needs ten million Euros.

Cairate mayor explains: “It is a project that will be divided into five courses of action **that will cost 10 million Euros**. This project can **develop a very important service sector** that come from Switzerland and Milan. The closed committee, composed of the mayors of valley town halls, together with **Malnate “I nostar radiis” (“Our roots” – cultural association)** and **“Gli amici della Valmorea” (“Valmorea friends” – association)**, are trying to create a lobby in order to carry out this project. **They’ve been thinking about it for 20 years**; the time is ripe: we want to create a tourist territory.”

“In order to carry out this project, the township **is buying a whole valley where it will be possible to carry out a ‘bike park and skate park’**”, Mazzucchelli goes on, “Some sort of two-wheels Park, with a flight of steps that directly leads to our

monastery. We're already buying the ground, and then we've to clear it up. If everything goes like clockwork, it won't take a long time. **This is part of territory relaunch**, but the reactivation of the railway must be the completion of **a marketing strategy in order to make Valle Olona revive**. Finding money shouldn't be so difficult, since **the whole area economic relaunch could exactly start from requalification of disused areas**: in the province there are **many parliamentarians** belonging to all alignments. We rely on someone who **is able to find necessary money**. Less Rome and more territory”.
