

## On Instagram the Aeolian Islands of Stefano Gabbana

**Pubblicato:** Giovedì 30 Agosto 2012

**Stefano Gabbana** is an avid user of **Instagram**, the social network dedicated exclusively to smartphones (iPhone and Android) that instantly shares users photos.

He shoots and publishes many every day: till now he has published 442 Following him, just on those social networks, there are **more than 57 thousand** in the world: but those same photos are seen by nearly 58 million twitter users on his @stefanogabbana profile, to which many of those photos are connected.

In his beautiful photos you can find the glamour of the catwalk, become passionate with him with the most beautiful flowers of the Mediterranean, or enjoy his holidays. For over a month in fact, those that follow him can enjoy a privileged view of the **Aeolian Islands**, where he is now on holiday. An extraordinary case of involuntary "territorial marketing": thanks to his photos, the Aeolian Islands are even more, if is possible, a place to dream. In the photo gallery here are some of them, taken from the social network.
