Varese News become a “child of Android” too

Pubblicato: Mercoledì 6 Marzo 2013

VareseNews become a “child of Android” too. Thanks to the work of Lab#ID, the **RFID laboratory of University Carlo Cattaneo – LIUC**, the new version of the app was developed. After the success for the app for iPhone, now, also **the owner of smartphone or tablet with Android can comfortably read VareseNews**, as well as interacting with the editing immortalizing the emotions of our province (and not only!) to share them with the rest of the community.

To download the app click here

The app of VareseNews keeps going better, in fact during the last updates some new features were introduced: you can use the links in the articles without leaving from the application, in this way you can go back rapidly to read the news; the sharing of the articles can be done on every social network, app, mail and even sms; during the last two updates the application became 20% lighter and more performing, to let even the older devices to access to VareseNews; **the interface is more accessible and suitable for “fingers”**.

One of the features of the last updates (dated 3 March) lets the app check by itself the availability of a new version, and notify the user without forgetting. **In every update new functionalities will be always added or those we already have improved.** As it is always convenient to have the last version available, the addition of this function is only for our readers.

With the introduction of the applications for smartphone you will have the possibility to read news everywhere, on the sofa, on the bus, on the train, during breakfast or walking. So you can let news come directly in your home, on the train, at the bus stop and wherever you want. Downloading the app and tell your friends to do it, we and you can keep on increasing this virtuous circle of services and information... and do not forget to vote the app 5 stars on Google Play and iTunes!
