

## Subsonica band on the stage of Albizzate Valley Festival

**Pubblicato:** Giovedì 31 Marzo 2016

We can say everything about the past thirteen live summer concerts of the **Mega association** young people except that they didn't know how to astonish. And with this year's announcement of the band that will start the **fourteenth edition of Albizzate Valley Festival** they succeeded again: **Subsonica will start the musical festival on Tuesday 7 July.**

It is about the first name made known by the association for the four days of concerts at the **La Fornace park of Albizzate** that this year will be staged **on July 7, 8, 9 and 10**. So this year the AVF starts with an injection of electronic/dance fascinations and sparkling refrains, mixed to drum'n'bass rhythms and rock energy.

Subsonica is one of the most well-known name of the **dance/rock/electronic Italian scene**. The band was born **in 1996 in Turin**. In these twenty years of activity they succeeded in conquering a more and more wide and cross public, modernizing and reshaping the music borders.

A journey supported by wonderful songs and live performances that made Subsonica one of the few Italian band able to speak an international language, taking to the top of the classifications also new textures and contaminations. In 2015 Subsonica was one of the fundamental protagonists of the live stage, with a summer tour and in the great successful clubs: more than 100 thousands spectators in all registered.

The 2016 edition will take place in the usual frame of "la Fornace" park in Vittorio Veneto street at

Albizzate. The concert pre-sales will be available on the **Ticketone.it** site.
