

## The magic of the railway Vigezzina under the snow

**Pubblicato:** Sabato 27 Febbraio 2021

The images that come from the Ossola valleys covered in white are very suggestive.

On the **Facebook page of the Vigezzina Centovalli** it is possible to admire some glimpses of the panoramic railway that crosses the snow-covered landscapes. The Vigezzina, which in autumn is renamed “**The foliage train**”, is one of the most beautiful panoramic railway lines in Italy. Its route connects Italy and Switzerland, among woods, valleys and mountain sceneries.
