When people used to ski on the Campo dei Fiori

Pubblicato: Sabato 13 Febbraio 2021

Going skiing on the Campo dei Fiori. In the **1970s** it was possible to do so and there was even a “rudimentary” ski lift available for skiers.

This is shown in Roberto Gorini’s video, which has been reposted on our group **Today in Varese province**. In this very interesting and curious video, you can see skiers going down from “Punta di mezzo” and then returning back up dragged along by a cable with a plate: in other words, the old-time ski lifts. There was a lot of snow, a beautiful sun and all around “our” Alps. How could you not be assaulted by a little piece of nostalgia. Here we propose to you the post with his video
