The idea of the students of the Istituto Tecnico Economico Tosi for the MIND area: “An application to detoxify from social networks”.

Pubblicato: Domenica 28 Marzo 2021

This is an application that helps with social detoxification. It was developed by a group of students from the **Tosi Institute** and their idea is one of the two winning ideas of the 2021 edition of the Social Innovation Campus hackathon, promoted by Fondazione Triulza.

The Campus Committee awarded the first prize of 2,500 euros to the SmartTosi team, which is made up of students from the 4th and 5th year of the Istituto Tecnico Economico Enrico Tosi in Busto Arsizio, for its **TimeUp #socialdetox project**, which involves the creation of a functional application for organising educational and fun activities in the MIND area (currently under construction in Rho) that will allow people to spend time away from electronic devices and create a community.
